# Copyright tips for Flinders University blogs and webpages

Use your own photos or ones sourced from the Flinders Visual Library. Do not copy photos found on Google or other sites.

If using images from free sites like Pixabay or Unsplash, or other sources licensed for free reuse, ensure you provide appropriate image credit if it's required.

Do not upload PDFs or files, other than university documents. In other cases, provide links documents you want to refer readers to.

Be careful using AI generated content as it may accidentally plagiarise other sources. Microsoft Copilot is the only tool approved for university use.
